PROFESSIONAL SUMMARY

Software Engineering student (CGPA 8.5/10) with hands-on experience in Java, Python, Spring Boot, SQL, and Linux, building RESTful APIs, backend systems, and AI-assisted applications. Strong foundation in OOP, DSA, and the SDLC, with exposure to unit/integration testing, Git-based collaboration, and cloud fundamentals (AWS, Azure, Docker). Fast learner of new languages and tools; comfortable managing ambiguity and communicating clearly in collaborative teams. Motivated by continuous learning and writing clean, maintainable code.

EDUCATION

SJC Institute of Technology

Bachelor of Engineering in Computer Science and Engineering

Expected Jun 2027

GPA: 8.5 / 10.0

TECHNICAL SKILLS

- **Languages:** Java, Python, SQL
- **Backend & APIs:** Spring Boot, Spring Data JPA, JDBC, Servlets, REST API Development, Hibernate
- **Database:** MySQL, SQL Schema Design, Stored Procedures
- **Cloud, DevOps & Tools:** Docker, AWS (EC2, S3), Microsoft Azure, Git, GitHub, Linux, CI/CD Fundamentals, Google Workspace (Docs, Sheets, Slides, Drive)
- **Core CS:** Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Software Development Lifecycle (SDLC), Unit & Integration Testing
- **AI/Automation:** LLM Integration (Groq/Llama 3.3), AI-Assisted Development, Speech Recognition, NLP, Workflow Automation

PROJECTS

Student Course REST API

Java, Spring Boot, Spring Data JPA, Hibernate, MySQL, Maven

- Engineered a layered RESTful backend (Controller-Service-Repository) to manage students, courses, and enrollments, improving modularity and maintainability
- Implemented full CRUD operations, entity relationships, and DTO mapping across resources, following REST API best practices and clean coding standards
- Validated endpoints through integration testing with Thunder Client; managed dependencies and version control via Maven and Git for repeatable builds

Student Management System

Java, JDBC, MySQL

- Built a database-driven student management system with a modular DAO layer, decoupling business logic from data access to simplify testing and maintenance
- Designed and executed SQL schemas and stored procedures for reliable CRUD operations, reducing redundant query logic

Jarvis AI – Python Voice Assistant

Python, REST API, LLM Integration, Speech Recognition, NLP

- Developed an AI-powered voice assistant with wake-word detection, speech-to-text, and text-to-speech pipelines for hands-free command execution
- Integrated Groq's Llama 3.3 70B LLM via REST API for natural-language Q&A and connected NewsAPI for real-time information retrieval
- Automated browser and application control through modular command handlers, enabling maintainable feature additions

EXPERIENCE

Software Engineering Intern

Internship Studio

Mar 2025 – Sep 2025

Remote

- Applied Core Java (OOP, Collections Framework, Exception Handling, Multithreading) to build small, production-style backend modules
- Practiced clean code and package structuring, improving readability, debugging efficiency, and maintainability

Networking Intern

Cisco

Jun 2025 – Aug 2025

Remote

- Built working knowledge of OSI/TCP-IP models, IP addressing, subnetting, routing, and switching to support cross-functional technical understanding
- Performed hands-on network simulation and troubleshooting using Cisco tools, strengthening systematic problem-solving and root-cause analysis

LEADERSHIP & ACHIEVEMENTS

- **NCC Cadet:** Completed the Shivaji Trail Trek and Maharashtra NCC Camp, demonstrating discipline, teamwork, and leadership under demanding conditions
- **Certifications:** JavaScript & Networking Essentials (Cisco Networking Academy), Cisco Packet Tracer, C Programming (Infosys Springboard), Python (GUVI), Microsoft Azure (Microsoft)
- Reached the semi-finals of Greenmind Hackathon 2025 with a carbon-credits solution concept for the public sector; participated in Ideathon 2025 and Smart India Hackathon (SIH)
- Secured 4th place at the State-level VTU One-Act Play competition and 1st place (cash prize) in the Street Play event at BGSET
